APPLYING FOR

Python Backend Developer

ABOUT ME

Why I switched from marketing to programming?

I've always had a structured, analytical way of thinking and a passion for building and improving things. About two years ago, while working in digital marketing, I discovered programming – and it instantly clicked. I realized software development would let me use my natural strengths to design tools and systems that can help people. Since then, I've been focused on learning and growing the skills needed to make the transition into tech.

Summary

Python Developer with experience in Object-Oriented Programming (OOP), Django, Django REST Framework, API development, JWT authentication, Pytest, PostgreSQL, Docker, and Streamlit. Flexible, solution-oriented, and committed to continuous learning in backend development and cloud technologies. Uses experience from digital marketing to create user-focused and effective software solutions.

PROJECT

Budget Management System Application

A comprehensive full-stack application for managing personal and family finances. The backend is built with Django REST Framework, while the frontend uses Streamlit for a fast, interactive experience. The project is fully containerized with Docker. Main features: multi-location tracking, bucket system (different financial purposes), income splitting, custom categories, and detailed analytics with visual insights.

Acquired hands-on experience with the following tools/technologies:

- Backend Development & APIs: Django, Django REST Framework (DRF), REST API Design, JWT Authentication, Asynchronous Task Management (Django Q), API Testing
- Data Storage & Caching: PostgreSQL (Neon), Redis (Upstash), Cache Invalidation & Optimization
- Frontend & Data Visualization: Streamlit, Pandas
- Version Control, Deployment & Infrastructure: Git & GitHub, Docker, GNU Make, Railway, Environment-Specific Configuration Management
- Testing: Pytest & Unit Testing, Model Bakery (test fixtures)
- Tools & Environment: Linux, Visual Studio Code, PyCharm, Docker

Backend (Django REST API): <https://api.elisei.pro>

Frontend (Streamlit): <https://app.elisei.pro>

EDUCATION AND TRAINING

Computer Science & Programming Courses

[CS50x: Introduction to Computer Science \(Harvard Univ.\)](#) | [Certificate](#)

Projects & Exercises ([GitHub source](#)): To-Do List, Tideman Election Simulator, Image Filtering Tool, Dictionary-Based Spell Checker, Credit Card Validator, Text Readability Analyzer, DNA Sequence Matcher, SQL Mystery Investigation in Fiftyville, Multi-Page Responsive Website and others.

[CS50's Introduction to Programming with Python \(Harvard Univ.\)](#) | [Certificate](#)

Projects & Exercises ([GitHub source](#)): Basic Calculator, Tip Calculator, Vehicle Plate Validator, Guessing Game, CSV Name Formatter and others.

[Scientific Computing with Python \(freeCodeCamp\)](#) | [Certificate](#)

Projects & Exercises ([GitHub source](#)): Arithmetic Formatter, Time Calculator, Budget App, Polygon Area Calculator, Probability Calculator, Cipher, Luhn Algorithm, Expense Tracker, Password Generator, Shortest Path Algorithm, Tower of Hanoi Puzzle Solver, Merge Sort Algorithm, Sudoku Solver, Binary Search Tree and others.

[CS50's Introduction to Databases with SQL \(Harvard Univ.\)](#) | [Certificate](#)

Music Library Database Project ([GitHub source](#)): I created a database designed to efficiently manage a digital music library, including songs, albums, and artists. It facilitates detailed tracking of play counts, favorite status, and associations between songs, albums, and artists, optimized with indexes.

[Clean Code \(Udemy\)](#) | [Certificate](#)

Skills: Clean naming, Good commenting principles, Code formatting, Single-responsibility, DRY code (Don't Repeat Yourself), Guard clauses, Error handling, Object-oriented design, the Law of Demeter, SOLID principles and others.

Skills acquired & Tools/Technologies I interacted:

- Python basics: data types, loops, conditionals, functions, object-oriented programming (OOP), testing, error handling, debugging, libraries, file I/O, regular expressions
- Data Structures: arrays, linked list, graph, hash map, set, stack, queue, tree
- Algorithms: Big-O notation, recursion, two pointers, sliding window, binary search, breadth-first search (BFS), depth-first search (DFS), backtracking, priority queue / heap, dynamic programming
- Databases, SQL: relational databases, CRUD (create, read, update, delete) operations, joins, views, indexes
- Tools: Git & GitHub, Visual Studio Code, PyCharm, Jupyter Notebook

2016 – 2019 Iași, Romania

Bachelor in Economics and Business Administration Universitatea „Alexandru Ioan Cuza”

Field of study Management | Thesis Well-being at workplace

WORK EXPERIENCE

SELLification – Educație și Formare Experiențială Timișoara / Online, Romania

Email contact@sellification.org | Website www.sellification.org

Marketing Manager

02/2020 – 02/2024

I started as a Junior Marketer, then rapidly advanced to Specialist Marketer and Marketing Manager.

- Created marketing content (emails, posts, campaigns) and delivered 750+ emails and 100+ Facebook Ads campaigns, generating tens of thousands of euros in sales.
- Managed and optimized digital channels (social media, websites, landing pages, automations in WordPress & Active Campaign), improving lead capture and conversions.
- Coordinated team projects as Project Manager, defining processes, delegating tasks, and ensuring timely delivery.
- Helped grow online communities to over 30,000 members and supported 50+ online events with 40,000+ participants.

Skills acquired & Tools used: Online Marketing, Copywriting, Social Media (Facebook Ads, Instagram, LinkedIn, YouTube), Email Marketing (Active Campaign), Marketing Strategy, Product Promotion, Project Management, Client & Technical Support, Basic Design (Photoshop, Canva), Video/Audio editing (Adobe Premiere), Collaborative tools (Microsoft Office, Google Suite, ClickUp, Trello, Asana, Slack, Zoom, Google Meet).

During my collaboration with the SELLification team, I have developed significant interpersonal skills:

- Proactive, clear, and considerate communication
- Active listening to better understand tasks and working methods
- Teamwork and support for colleagues whenever needed

Beekeeper Galati, Romania

Freelancer

04/2013 – 07/2019

I started and managed a family business when I was 16 years old (during high school through university):

- Produced ~750 kg of honey annually
- Bred ~150 Buckfast queen bees annually
- Generated ~3,000 EUR average annual profit

LANGUAGE SKILLS

● **Română: Nativ | English: B2/C1 (conversational to professional level)**

ME BEYOND CODE

Who am I?

I am a happy husband. :)

I build my life around my values and beliefs.

I like playing the piano, reading in nature, and running.

I am happy when I make others happy.

I appreciate punctuality, order, and I pay attention to details.

I seek to make my work easier through optimizations and automations.

I believe there is always room for kindness, friendliness, and respect.

I believe that every person is beautiful in their own way, with strengths and weaknesses.

Hobbies

- Music and playing the piano: <https://youtu.be/0jZpEHIMWDQ>
- Technology (applications and devices)
- Sport
- Reading
- Cars & Driving
